

STABILIZED PRO GOLD INFIELD MIX W/ RED DIAMOND CC

1. Gradation – A minimum of 95% of particles shall pass the 2.0 mm sieve with the highest proportion of sand particles in the medium to fine range. The particles that do not pass the 2 mm sieve shall be limited to fine gravel and shall not exceed 5%. Combined silt plus clay content shall be in the range of 30 - 35% with the allowable difference between silt and clay particles no greater than 5%. All of the above percentages are based on weight and not by volume.
2. Natracil™ organic binder as distributed by Gail Materials (951) 667-6106 shall have a minimum swell volume of 35 ml/gm and shall be incorporated by use of a pug mill that includes a weight belt feeder at the rate of 0.3 percent by weight.
3. Red Diamond conditioner shall be incorporated by use of a pug mill that includes a weight belt feeder at the rate of 50 lbs per ton of Pro Gold Infield Mix.
4. The color of the material shall be gold to reddish gold.
5. Supplier – Gail Materials (951) 667-6106.
